MORE PLUG THAN BEFORE

Output in Petersburg Much Greater Since Advent of British-American Company.

EDUCATE THEM AS FARMERS

The John A. Dix Industrial School to Pursue This Special Line-Petersburg Notes.

PETERSBURG, VA., August 8.-It is asserted by members of the tobacco trade in Petersburg that the product of plug tobacco in this city, owing to the largely production of American plant, is larger than ever before in the history of the trade. It is said to be the purpose of the British-American Company to make Petersburg its headquarters for the manufacture of all varieties of plug tobacco suitable for the export trade.

From what is stated to be the product of this factory its demands for leaf tobacco for its plug work, will exceed the entire amount of leaf sold by the warehouses of Petersburg during the

In addition to this large product of plug by the British-American Company, and consequent demand for leaf tobacco, there is a considerable amount of plug tobacco manufactured by independent factories here for both export and donestic markets.

The market is also strengthened by very large orders for leaf tobacco to be shipped direct to foreign governments. Helying on these facts, the tobacco men here look forward to very large receipts of leaf in the coming tobacco year, and to good prices. Including the wages paid here by the American Cigar Company for the manufacture of cigars, and for stemming cigar leaf, the amount of wages distributed weekly to workers in the tobacco factories is greater than ever lefore in the history of the city. ATHE DIX INDUSTRIBAL SCHOOL. There are in Southside Virginia several institutions for the education of negroes, which have been founded and are mulntained by benevolent people in the North. Among such institutions is the John A. Dix Industrial School at Dinwiddle Va. Mr. Horace Churchman, of Philadelphia, vice-president and secre-

widdie Va. Mr. Horace Churchman, of l'hiladelphia, vice-president and secre-tary of the board of directors of this institution, on Saturday last installed Professor J. M. Colson as its superin-tendent.

Professor Colson received his early training in the public schools for the instruction of negroes in this city, and was prepared for college in the Middle-borough (Massachusetts) High School, he graduated at Dart Jouth College in IRM, since which time he has been connected with the Virginia Normal and Industrial Institute, situated in the village of Ettrick, in Chesterfield county, just across the river from Petersburg. The directors of the John A. Dix Industrial School have decided to make it a school for training students to be practical farmers, and all the instruction neademic and industrial, will be projected along lines looking to the greatest efficiency in agriculture.

Captain Charles E. Vawter, of the celebrated Miller School, is now one of the influential members of the board of directors of the Virginia Normal and Industrial Institute, and its courses of instruction have been changed with a view to making it a school of tech-

rectors of the Virginia Normal and Industrial Institute, and its courses of inerruction have been changed with a
view to making it a school of technology for the education of young colored men and women.
